

BIKE/QUAD SECURITY AIRBAG

This year, the organization of the Rallye du Maroc integrated to its 2021 regulations the implementation of new measures to improve the safety of bike and quad pilots. Among these measures features the obligation to wear an airbag jacket.

As mentioned in the article 16 of the 2021 Bike & Quad regulations, the pilot commits to wear an airbag jacket with a fully functional cartridge and to carry with them on their machine one replacement pressurized cartridge.

However, since it is an innovation in rally-raid and exceptionally for this year, the organization of the ANDALUCIA RALLY commits to provide the replacement cartridges. The latter will be available during each stage as well as in the bivouac. To get a new cartridge, the pilot will have to return his used cartridge.

In order to ease the purchase of your airbag jacket, you can find below all the information related to the different commercialized products compliant with the F.I.M homologation:

MANUFACTURER	AIRBAG COMMERCIAL NAME	CONTACT TO ORDER	EMAIL
